

Toy Boat

What you need:

- Styrofoam bowl
- drinking straw
- colored paper
- clay or play dough
- scissors
- stickers (optional)
- tape (optional)

What you do:

1. Cut a sail shape (square or triangle) from the colored paper. Attach it to the straw with tape, or cut slits in the paper and weave the straw through the slits.
2. Stick a piece of the clay or play dough (about a grape-sized piece) in the bottom of the bowl.
3. Anchor the end of your drinking straw mast into the clay.
4. Decorate your ship with stickers, and set sail in the sink or bathtub.
